EX-101

Document No. *5*

MEMORANDUM FOR: MR. DULLES

25X1A9a SUBJECT : Location for our Proposed New Building.

1989
12 JAN 1979

1. Paul, Houston, Garrison, [REDACTED] and I met this morning to discuss actions we might take in the immediate future with regard to our building location. We believe that:

a. Freehill, the new Chairman of the Fairfax County Board, will go along with Langley but probably will not give us the same degree of support that we would have received from the former Chairman. In any case, we agree that I should see him and discuss his feelings at an early date.

b. We should prepare a digest of the Clarke & Rapuano report for Senator Saltonstall and others. This is being done.

c. You should ascertain from The White House whether they will support us in our choice of Langley.

d. You, personally, should contact Senator Chavez and Congressman Mahon with a view to arranging for an informal presentation to a small and select group of their Committees so as to obtain informal guidance.

e. You should speak to The Secretary of Defense, and possibly The President, as to whether Arlington Hall would be acceptable and could be made available if Langley falls through.

f. It may be inadvisable to approach Senator Neely. However, Norman Paul wants to study this further and will give us a positive recommendation in a day or so.

g. We should make every effort to settle our differences with the General Services Administration at an early date.

h. When we make our next presentation to the National Capital Planning Commission we should insist on being present, have Messrs. Clarke & Rapuano both there, and let them argue our case.

25X1A6a 2. In line with your suggestion, I will start immediately to study again the possibility of locating certain units at [REDACTED]. Without prejudging the results, however, I feel that the numbers who could be located there would not be large and that the cost would actually be greater than it would be to locate them with the rest of the Agency.
